

François has worked 10 years in the field of sales and marketing, including the creation and leadership of the European sales team of software solutions in artificial Intelligence at Nokia.

In 2017, he has become Chief Sales and Marketing Officer at DreamQuark, an Artificial Intelligence software startup based in France, serving banks and insurance, such as BNP Paribas, AG2R, Groupama Gan, Carte Bancaire etc..

DreamQuark develops an Artificial Intelligence software platform which can be trusted, controlled and used by Business Users. Based on an advanced proprietary Deep Learning technology, Brain quickly delivers unmatched and interpretable results to create Financial Services applications in fraud, risk, marketing and compliance. DreamQuark has won multiple awards including the "Fintech of the Year" prize by Finance Innovation, national best AI company by "10 000 startups", as well as the "Best Cognitive Platform" award by Bank & Innovation.

François holds an MBA from INSEAD and an engineering degree from the Ecole Centrale de Nantes.
