

Malika previously was Global Lead for Google Developers Launchpad Studio, and is now a Global Lead on the Google Developers Launchpad team. The *Launchpad* program is the global startup acceleration engine of Google - and *Launchpad Studio* focuses on supporting the Machine Learning (ML) startup ecosystem and on developing product methodologies for applied ML.

Prior to joining Google, Malika was a co-founder and partner at Comet Labs, a venture capital firm and experimental research lab focused on investing and supporting Artificial Intelligence, ML, and robotics startups. She has worked with entrepreneurs her entire career, in London, Beijing, Singapore, Toronto, and Silicon Valley. She received her Bachelors from the University of Cambridge, and her Masters from MIT, Tsinghua University, and London Business School.
